PROFILE

Finance student at Walton College of Business with hands-on experience in financial modeling, quantitative analysis, and business development. Founded and scaled a revenue-generating company to \$2,500 average revenue per client, securing nearly \$1M in athletic scholarships for client families. Bilingual in English and Spanish.

CORE COMPETENCIES

Financial Modeling | Revenue Forecasting | Data Analysis | Budget Management | KPI Development | Cost Analysis | ROI Analysis | Pricing Strategy | Operations Management | Business Development | Microsoft Excel | Process Improvement | Bilingual (English / Spanish)

WORK EXPERIENCE

Founder

May 2025 - Present

Elite Level Scouting LATAM - Santa Cruz, Bolivia

- Designed the full revenue architecture from zero: multi-year payment structures, tiered pricing model, and unit economics framework yielding \$2,500 average revenue per client with positive margin across all active accounts
- Built recurring revenue forecasting models to project ARR, monitor payment cadences, and track client lifetime value; 100% collection accuracy maintained across the full portfolio
- Conducted competitive pricing analysis and ROI modeling to validate service tiers; achieved 100% athlete placement rate and secured nearly \$1M in scholarship value for client families; won 1st Place and a cash prize at the Made U of A pitch competition, University of Arkansas

Venture Founder, Summer Business Incubator

June 2026 - August 2026

Office of Entrepreneurship & Innovation, University of Arkansas - Bentonville, AR

- Selected for a competitive university-sponsored program; stress-tested Elite Level LATAM's financial model under structured mentor review, refining unit economics, margin assumptions, and multi-year revenue projections
- Built investor-facing materials including market sizing analysis, revenue scenarios, and a scalability model for the Latin American student-athlete recruitment market

Logistics Intern

December 2025 - January 2026

Trebol Ingeniería y Construcción SRL - Santa Cruz, Bolivia

- Supported financial and operational coordination across 32 active construction projects, managing materials flow, documentation, and cross-functional communication
- Designed and deployed a centralized Google Workspace documentation system that reduced coordination and documentation errors by an estimated 50%, improving operational efficiency
- Maintained Microsoft Excel-based inventory tracking and supplier cost logs, supporting budget monitoring and variance tracking across simultaneous project phases
- Built and deployed a centralized software platform now used as Trebol's core operating system, integrating commercial, finance, and logistics operations with real-time reporting, inventory management, and a CRM featuring automated lead-management bots, marketing campaign tools, and budgeting capabilities

Connection Desk Ambassador

August 2026 - Present

Cordia Harrington Center for Excellence (CORD), University of Arkansas - Fayetteville, AR

- Serve as first point of contact at the CORD, guiding students through Workday Student and Blackboard navigation, academic advising scheduling, and referrals to campus support resources
- Coordinate front-desk operations, phone and email inquiries, and appointment scheduling across advising, tutoring, and student success services, resolving day-to-day issues to maintain smooth center operations

TECHNICAL & ANALYTICAL SKILLS

- Financial Analysis:** Financial modeling, revenue modeling, pricing analysis, quantitative analysis, cost analysis, budget management, KPI development, ROI analysis, variance analysis, recurring revenue forecasting
- Microsoft Excel:** Scenario Analysis, Solver, financial dashboards, data visualization
- Software Development:** Built and deployed a full-stack business management platform for Trebol (Next.js, TypeScript, Drizzle ORM, Turso/libSQL database) with CI/CD via GitHub Actions and Vercel, cloud file storage via Cloudflare R2, and automated uptime monitoring and error alerts via Telegram bot integration
- Operations & Data:** Data analysis, funnel analysis, workflow design, process improvement, inventory management, cross-functional collaboration
- AI-Assisted Research:** Claude Code in Action (Anthropic) - applying AI tools to accelerate financial research, data synthesis, and analytical workflows
- Languages:** English (fluent), Spanish (native)
